

Sika Mexicana S.A. de C.V.

Monday March 07th, 2011.

Testimonial

Sika Mexicana has performed tests with the Concrete Optimizer in order to study the amount of savings ready-mix producers can expect from using the system.

In Sika Mexicana, after 10 months of tests, we have been able to use the Concrete Optimizer with the Sika admixture technology achieving savings of up to 2.5 USD/M3 in the tests we performed.

The savings vary depending on the quality of the materials, this system together with our admixture's technologies have an important potential on special projects.

Best Regards,

Carlo Rocha
Business Unit Concrete Manager
